70-298: Designing Security for a Microsoft Windows Server 2003 Network (Note: Can be used as an option) or design requirements are, but not both.

Passing Score

Beginning with the version of Microsoft Windows Server 2003 in connection with audits, Microsoft provides numerical values for tests. The new standard requires a minimum score of 700 on all the tests. The maximum score on the tests vary de-applications will be measured on the complexity of the skills. You can from this de-tails on the Microsoft website to update themselves for the changes.

About the tests themselves

There are seven tests pass in all and can dull with the various question patterns, scenarios, etc. If you are not cast in the hours of preparation and is available on every page of every book you would not be a passing score in all the seven tests at once .

Something on the assessment model can help you. Most of the questions in the exam have several options. The questions require close the "best" answer from several responses. Some questions may present an implementation scenario, requirements, and a proposed solution and then ask whether the solution to all of the requirements or combinations of primary and secondary requirements.

Microsoft has introduced some testing innovations for the certification exams such as Hot Zone, Active Screen, Drag and Drop, Case Study-based test demo, testing with simulations.

Note: Exams 70-297 and 70-298, any time, either as a core design exam or verification of credentials count.

Resources

The best way to succeed is a hands-on, hands-on and hands-on. But then again, you would not lose if you have a number Sybex preparing a book or MSDN site itself for the knowledge base, case study, and so on trying. See how many white papers as you can on all Microsoft technologies, it is the best way to understand a technology from the basics. Finally, do not appear for the test before your hands are a good example simulator, especially if it is your money and time is precious to you.

Be warned! Study or do not buffalo. These tests are now wearing simulation-based questions. If you are up to now questioned on the concept of Disk Administrator utility, you can now encouraged to use it effectively in the exam. For this reason, your only choice is 2003 not only known by all administrative and maintenance costs and toll in Windows, but also really good!
